

■# Alex Place Founder All-Streams Convergence Master Report (2026-05-27)

FOUNDER DIRECTIVE

This packet consolidates all major Lantern streams, user fronts, repo fronts, and operator fronts into one long-form convergence view with explicit evidence classes and web-grounded market context.

STREAMS INDEX

Stream	Scope	Current State
Control Plane	lantern-os + report/render pipelines	active
Execution Plane	orchestrator + MCP service supervision	mapped, evidence-linked
Memory Plane	RAG dollhouse + flat file + manifests	active
Money Plane	wallet/invoice factual ledger	active, disciplined
Product Plane	founder packets + public-facing packaging	active
Governance Plane	Arc Reactor + evidence class gates	active
Expansion Plane	store lanes, game lanes, legacy repo intake	candidate/projection

REPO UNIVERSE SUMMARY

State	Repo / Path	Role
local_inspected	C:\tmp\lantern-os	canonical control plane
local_inspected	C:\Users\alexp\Documents\gm-agent-orchestrator	MCP/orchestrator execution plane
local_inspected	C:\tmp\human-flourishing-frameworks-scan	source evidence and prior packets
local_inspected	C:\Users\alexp\Documents\lantern-symbolic-sandbox	quarantine symbolic lane
metadata_only	place_co, ChildOfLevistus, gamemaker-room-editor, moneybags, SmartBid, smartmealplanning	intake candidates

WEB SIGNAL GROUNDING (MAY 2026)

Source	Key Signal	How Founder Should Use It
U.S. Census BTOS (May 26, 2026)	business AI usage trends are stable and non-trivial; expectations remain active	stay practical: offer scoped value, not hype
OECD SME AI adoption (2025)	adoption success depends on maturity, skills, compute, and fit	keep offerings modular and readiness-tiered
NIST AI RMF + GenAI profile updates	risk-managed AI governance remains core	preserve evidence/validation gates in all outputs
GAO-26-107828 (May 2026)	AI opportunity exists, but controls/transparency gaps matter	strengthen governance claims only with receipts

PAST 2 WEEKS CONVERGENCE

Area	Past-2 Outcome	Evidence Class
Founder packet system	multiple report variants, long-form and print modes created	repo_verified
Style pipeline	light/dark/no-opacity/print-bw renderers established	repo_verified
Wallet motion	invoice_sent recorded; no false revenue	repo_verified

Area	Past-2 Outcome	Evidence Class
RAG unification	all-stream index and workstream maps present	repo_verified
Process controls	validation and audit manifests added	repo_verified

NEXT 2 WEEKS FOUNDER PRIORITIES

- 1. Collect 5 factual outreach/result events in wallet ledger.
- 2. Publish one weekly founder packet with strict evidence classes.
- 3. Add claim-to-artifact crosswalk for all patent-candidate language.
- 4. Run one external-safe summary and one internal technical annex.

NEXT 4 WEEKS EXPANSION OUTLOOK

Week	Goal	Proof Artifact
Week 1	lock operating cadence	dated report + validation receipts
Week 2	convert one offer lane to clear outcome	wallet event chain
Week 3	build intake appendices for metadata-only repos	repo appendix pack
Week 4	decision checkpoint on promote/hold per stream	founder signoff matrix

ALL FRONTS RISK MATRIX

Front	Main Risk	Mitigation
Product front	over-claiming readiness	enforce evidence labels in every section
Money front	symbolic revenue drift	keep cleared cash separate and factual
Ops front	dirty worktree confusion	commit in narrow slices with audit notes
Governance front	confidence inflation	change scores only on new receipts
Public front	style over truth	keep text authoritative; art decorative

PATENT CANDIDATE SUMMARY (INTERNAL DRAFTING)

ID	Candidate	Confidence
LC-001	local-first artifact-to-packet convergence engine	medium-high
LC-002	factual wallet state machine for AI ops	high
LC-003	accessible profile-evolving report compiler	medium
LC-004	evidence-gated staged confidence governance	medium
LC-005	symbolic overlay auxiliary channel protocol	medium

OPERATOR READOUT

The strongest position is disciplined local execution with factual cash logging and repeatable report outputs. The highest leverage move for the next 14 days is outcome capture, not additional styling breadth.

FOUNDER DECISION

Promote execution cadence, hold over-claims, and force every confidence increase to pass through receipts.
