

■# COMET LEAP Michah !perfect Advice Report v7

Generated: 2026-05-27 (America/New_York)

FOUNDER SIGNOFF LINE

This v7 replaces lower-value filler with a strict evidence hierarchy.
Priority order is: Michah primary notes -> local repo-verified state -> held/unconfirmed.

EVIDENCE HIERARCHY

Rank	Evidence Class	Source	Use Policy
1	primary_user_source	Michah handwritten note images (2026-05-27)	Drives core claims and advice
2	repo_verified	local profile, wallet, ledger, scripts	Operational constraints and receipts
3	held_unconfirmed	low-legibility text or unresolved interpretation	Never used as a decision fact until confirmed

MICHAH PRIMARY DATA (HIGH-CONFIDENCE TRANSCRIPTION)

Claim ID	Extracted Statement	Confidence	Source
M-001	"Polymarket is not gambling"	High	user image batch, page with boxed statement
M-002	"Shadow 557 used to be religious would believe in god"	High	user image batch, same page
M-003	"Shadow 557" page includes "new crypto", "new wallet", "new poly market", "new worldview model"	High	user image batch, Shadow 557 page
M-004	"Confidence: 35%"	High	user image batch, Shadow 557 page
M-005	Diagram includes "Autism", "Particle Collisions", "Neuro Atypical", "Overcompensate", "Corrections"	High	user image batch, concept map page
M-006	Board layout includes "Groups/Labs", "Achievements", and "Answer -> Truth" flow	Medium-High	user image batch, board page
M-007	Planning page references "Ask the doctor" and "JARVIS"	Medium-High	user image batch, planning page

HELD/UNCONFIRMED FROM NOTES (NOT USED AS FACTS)

Item	Reason Held
Low-legibility words/numbers in achievement blocks	Handwriting unclear in image quality
Ambiguous fragments on the blue-ink page	Rotation and contrast limit reliable transcription
Any inferred diagnosis-level conclusions	Out of scope without clinical evaluation

REPO-VERIFIED OPERATIONAL STATE

Lane	Current State	Confidence	Evidence
Profile	profiles/michah/profile.json exists	High	local file present

Lane	Current State	Confidence	Evidence
Report evolution	v6 run recorded in profiles/ michah/report-evolution .jsonl	High	local file tail check
Wallet	cleared \$0, pending \$199, draft \$199	High	data/wallet/local-cash- wallet.json
Latest ledger event	invoice_sent	High	data/wallet/ledger.json l

V1 TO V7 TIMELINE

Version	Timestamp	Change	Evidence Quality Shift
v1	2026-05-27 17:14 ET	Baseline report generated	Script default
v2	17:15 ET	Wallet/ledger truth locked	Repo-verified
v3	17:16 ET	External web context added	Mixed quality
v4	17:17 ET	Advice density increased	Mixed quality
v5	17:18 ET	Added risk boundaries	Mixed quality
v6	17:19 ET	Integrated action packet	Mixed quality
v7	17:2x ET	Rebuilt around Michah primary data; removed filler claims from core logic	High-value evidence first

ADVICE (DRIVEN BY MICHAH DATA)

This is decision support, not medical/legal advice.

Advice Lane	Evidence Driver	Recommendation
Truth framework	M-006 (Answer -> Truth)	Run a weekly truth board: claims, evidence, disconfirmers, status
Market behavior guardrails	M-001 + M-003 + M-004	Treat prediction/crypto activity as bounded-risk experiments with hard loss caps and cooldown rules
Identity/worldview transition	M-002 + M-003	Separate worldview exploration from financial decision loops; do not let belief shifts auto-trigger money moves
Neuro-load regulation	M-005	Add a daily overload check (sleep, stress, focus) before high-impact decisions
Build orientation	M-003 + M-007	Use one execution lane: wallet + research + Lantern tasks in one written sprint board

72-HOUR HIGH-VALUE ACTIONS

- 1. Build a MICHAH-TRUTH-BOARD with 10 claims from the notes and explicit evidence status.
- 2. Write a one-page risk policy for wallet/prediction actions: max loss, max daily exposure, no-trade triggers.
- 3. Run one closed-loop build sprint: define one output, complete it, log result against confidence.
- 4. Re-score confidence from 35% using receipts only (finished tasks, cash events, validated outputs).

BOUNDARIES

Boundary	Enforcement
No diagnosis claims from notes alone	Keep health conclusions as "evaluate with clinician" only
No ambiguous transcription used as fact	Keep unclear text in held bucket
No confidence increase from intention alone	Confidence rises only from receipts

DECISION

Adopt v7 as the active report because it centers Michah's highest-value data and explicitly quarantines uncertain or filler inputs.
