

Convergence Context - Condensed Report

Date: 2026-05-30
Scope: New information relevant to ASI Arc Reactor MK1 convergence
Status: Contextually convergent summary

CURRENT CONVERGENCE STATE

ASI Arc Reactor MK1: Converged and merged to master (commit 65fff37)
Confidence Scores: Movie 1 Garage (92%), Movie 2 Public Platform (61%), Movie 3 Distributed Fleet (29%), Human Trial Demo Readiness (18%)
Convergence Loop: 0 actionable issues (passed)

NEW INTEGRATION COMPONENTS

- ASI Arc Reactor MK1 Skill**
- **Location:** skills/asi-arc-reactor-mk1/SKILL.md
 - **Novelty:** ASI patterns as architecture references only (no capability claims)
 - **Key Feature:** Brier-style error tracking for confidence calibration
 - **Safety:** Explicit blocked claims list (investment advice, free compute, etc.)

- Windsurf Hooks System**
- **Location:** .windsurf/hooks.json + 10 hook scripts
 - **Novelty:** Comprehensive pre/post hooks for all AI agent actions
 - **Safety:** Validate-DemoSafety, Validate-McpTool, Validate-FileWrite, Validate-FileAccess, Validate-PromptSafety
 - **Audit:** Log-FileRead, Log-FileWrite, Log-CommandExecution, Log-McpToolUse, Log-CascadeResponse

- Human Trial Demo Workflow**
- **Location:** .windsurf/workflows/human-trial-demo.md
 - **Novelty:** Complete workflow with safety gates and evidence collection
 - **Gates:** Evidence (5 demos with cleared cash), Safety (MCP canary), Recovery (rollback path), Consent (human approval), Medical (PPE evidence), Capability (no ASI claims without validation)

REPOSITORY CONTEXT FOR CONVERGENCE

- Active Dependencies (43 repos)**
- **Core Control:** lantern-os (project/control plane)
 - **Execution:** gm-agent-orchestrator (MCP source), gamemaker-room-editor (tooling), lantern-symbolic-sandbox (RAG/quarantine)
 - **RAG:** human-flourishing-frameworks (COMET LEAP source)
 - **Business:** 15 services (moneybags, payment bridge, etc.)
 - **Games:** 10 projects (GameMaker, libGDX)
 - **Libraries:** 3 (API clients, forks)

- HFF Recovery Snapshots (5 local)**
- hff-lantern-recovery, hff-evidence-master-clean, hff-master-clean, hff-release-candidate, hff-seven-validate
 - **Status:** Retired references (evidence only)

THEORETICAL CAPABILITIES RELEVANT TO CONVERGENCE

- ASI Pattern Integration**
- **Novel Approach:** Architecture references only, strict claim boundaries

- **Evidence-Based:** Brier-style error tracking, confidence calibration
- **Safety:** Human trial readiness gates (18% baseline)
- **Next:** Execute \$1000 founding seat demos for evidence

COMET LEAP Integration

- **Novel Approach:** 30-day model for founder wisdom
- **Integration Point:** ASI Arc Reactor uses COMET LEAP framework
- **Evidence-Based:** Bayesian confidence updating, founder wisdom protocols
- **Next:** Integrate COMET LEAP into Lantern OS

Safety-First Agent Orchestration

- **Novel Approach:** Pre/post hooks for all agent actions
- **MCP Canary:** Validate tools before exposure
- **Audit:** Central logging for transparency
- **Next:** Validate MCP canary for automation safety

CONVERGENCE-READY COMPONENTS

Proven (Production-Ready)

- Game development tools (GameMaker, libGDX with cloud access)
- Convergence loop (12-step validation process)
- Safety hooks (Windsurf hooks system)

Prototype (Evidence Collection)

- ASI Arc Reactor MK1 (needs evidence: 5 demos with cleared cash)
- Agent orchestration (needs MCP canary validation)
- Business services (needs secrets/env review)
- Symbolic sandbox (needs rights review)

Theoretical (Research Direction)

- COMET LEAP framework integration
- Human flourishing metrics
- Bayesian founder wisdom extraction

IMMEDIATE CONVERGENCE ACTIONS

This Week

- 1. **Evidence Collection:** Execute \$1000 founding seat demos (5 required for human trial readiness)
- 2. **MCP Canary:** Validate MCP canary for automation safety
- 3. **Convergence Loop:** Run convergence loop and fix first 4 issues
- 4. **Secrets Review:** Complete secrets/env review for business services

Next 30 Days

- 1. **COMET LEAP Integration:** Integrate COMET LEAP framework into Lantern OS
- 2. **Agent Orchestration:** Complete agent orchestration with safety hooks
- 3. **Business Automation:** Complete business service automation
- 4. **Evidence-Based Promotion:** Implement evidence-based promotion system

Next 90 Days

- 1. **Human Trial Demo:** Execute human trial demo with evidence
- 2. **Founder Wisdom:** Extract and use founder wisdom in decisions
- 3. **Flourishing Metrics:** Develop human flourishing metrics
- 4. **ASI Pattern Integration:** Complete ASI pattern integration with evidence

CONVERGENCE METRICS

Metric	Current	Target	Status
Convergence Loop Issues	0	0	■ Passed
Human Trial Readiness	18%	50%	■ Needs Evidence
ASI Pattern Integration	72%	90%	■ Needs COMET LEAP
Distributed Fleet	22%	50%	■ Needs Multi-Node
MCP Canary Validation	Pending	Passed	■ Needs Validation
Business Services Secrets	Pending	Reviewed	■ Needs Review

KEY NOVEL INNOVATIONS

- 1. **ASI Arc Reactor MK1:** Architecture references only, no capability claims, Brier-style error tracking
- 2. **Windsurf Hooks:** Comprehensive pre/post hooks for all AI agent actions with audit logging
- 3. **Convergence Loop:** 12-step evidence-based validation process
- 4. **COMET LEAP Framework:** 30-day model for founder wisdom and decision making
- 5. **Evidence-Based Promotion:** Theoretical → Prototype → Proven → Production path

SUMMARY

ASI Arc Reactor MK1 converged to master with 0 issues. Key innovations: ASI pattern integration without capability claims, comprehensive safety hooks, evidence-based convergence loop. Next actions: evidence collection (\$1000 demos), MCP canary validation, COMET LEAP integration.

- Current State:** Converged, evidence collection phase
- Next Phase:** Human trial demo readiness (target: 50%)
- Long-term:** Production-ready local-first AI control plane
