

Lantern OS Discord Community Operator Packet

Generated: 2026-05-26.

Status: proposed, dry-run only. No live Discord changes have been applied.

Purpose: give the operator a careful, admin-safe plan for setting up a friendly Lantern OS Discord community around the local garage, RAG house, learning packets, radio/listening rooms, and project coordination.

EVIDENCE

Item	Current State
Local repo	C:\tmp\lantern-os
Community manifest	manifests/DISCORD-COMMUNITY-CONVERGENCE.md
Dry-run script	scripts/Invoke-DiscordCommunityDryRun.ps1
Discord token	Present in local environment
Voice channel setting	Present in local environment
Verified guild/server ID	Not present during last inspection
Live server mutation	Not applied

BOUNDARY

This packet is for calm community setup. It is not an instruction to broadly change a live server without review. Live changes require:

- verified target guild/server ID;
- current channel list;
- confirmed bot permissions;
- dry-run output;
- operator approval.

RECOMMENDED TONE

Use warm, simple names:

- home base;
- welcome desk;
- study room;
- workshop;
- listening room;
- project board;
- helper;
- moderator review.

Avoid intense control language. The server should feel like a workshop people can understand and trust.

PROPOSED SERVER MAP

Category	Channel	Purpose	Setting
Welcome	#welcome	Short orientation and tone.	Read-only except moderators.
Welcome	#start-here	Current links and next step.	Keep short and current.

Category	Channel	Purpose	Setting
Workshop	#lantern-garage	Build updates, screenshots, local app status.	Main project channel.
Workshop	#rag-house	Sources, RAG intake, evidence labels.	No raw private dumps.
Workshop	#cash-sprint	Offers, invoices, outreach receipts, objections.	Factual cash state only.
Study	#founder-wisdom	Priors, evidence maps, careful review, decision cards.	Use consensus checkpoints.
Study	#learning-packets	School, art, math, and science packets.	Keep protected material private.
Audio	#listening-room	Radio status, playlists, media notes.	Rights checked first.
Audio	Lounge	Voice room for music, study, and check-ins.	Bot joins only when invited/configured.
Ops	#ops-log	Bot status, validation receipts, maintenance notes.	Keep non-secret.
Ops	#moderator-review	Soft moderation and safety review.	Trusted moderators only.

WELCOME MESSAGE

Welcome to Lantern OS.

This is a small local-first workshop for building useful tools, learning packets, RAG notes, radio/listening rooms, and careful decision records.

We keep claims labeled, protect private material, and turn ideas into small validated next steps.

SERVER SETTINGS

Setting	Recommendation
Verification	Medium if public, low if private/invite-only.
Explicit media filter	On for public channels.
Default notifications	Mentions only.
Community features	Enable only when onboarding is ready.
Bot permissions	Least privilege: read/send messages, join/speak in selected voice channels.
Message management	Grant only if moderation workflow needs it.
Broad admin permissions	Avoid for bots unless reviewed and required.

DRY RUN

Run:

```
powershell -NoProfile -ExecutionPolicy Bypass -File .\scripts\Invoke-DiscordCommunityDryRun.ps1
```

Expected behavior:

- reads the target guild only if LANTERN_DISCORD_GUILD_ID is set;
- prints existing and missing channels;
- applies no changes.

APPLY DECISION

Do not apply live changes until a dry run shows:

- correct guild/server name;
- expected existing channels;
- exact proposed creates or reviews;
- no unexpected permission escalation.

CURRENT DECISION

Hold live apply.

Reason: a verified guild/server ID was not present during the last inspection.

The correct next move is to set the target guild ID, run the dry run, review the output, then approve or revise the channel map.
