

Kalshi Near-Term Events Report

****Date:**** 2026-05-30
****Scan Time:**** 21:20 UTC
****Window:**** Events ending 5-15 minutes from now
****Status:**** No events found in target window

Simple Answer

No Kalshi events are ending within the next 5-15 minutes from now. The system scanned 5,000 markets and found 0 candidates matching the time window criteria.

Scan Parameters

Parameter	Value
Scan Window	5-15 minutes from now
Markets Scanned	5,000
Pages Pulled	5
Candidates Found	0
Paper Orders	0
Real Money Spent	\$0.00

What This Means

****No Immediate Opportunities:**** There are no Kalshi markets with events ending in the 5-15 minute window that meet the filtering criteria (minimum activity, bid/ask spread, risk limits).

****System Status:**** The Kalshi near-term paper block system is functioning correctly. It successfully:

- ⌚ Pulled 5,000 markets from Kalshi API
- ⌚ Filtered by time window (5-15 minutes)
- ⌚ Applied activity and risk filters
- ⌚ Found 0 qualifying candidates

****Next Action:**** Consider expanding the time window to 30-120 minutes to find more opportunities, or wait for new events to enter the 5-15 minute window.

Why No Events Found

The system filters events based on:

1. **Time Window:** Events must end 5-15 minutes from now
2. **Minimum Activity:** At least \$5 visible trading volume
3. **Bid/Ask Spread:** Must have valid bid and ask prices
4. **Risk Limits:** Maximum loss per order limited to \$1
5. **Market Status:** Must be active/open

Given these filters, no events currently match all criteria in the 5-15 minute window.

Alternative Windows

15-minute window (5-20 minutes): 0 candidates

30-minute window (5-35 minutes): 0 candidates

120-minute window (5-125 minutes): 10 candidates found

The 120-minute window shows opportunities, but they are outside the 5-15 minute target range.

Recommendation

Option 1: Wait 5-10 minutes and rescan - new events may enter the window

Option 2: Expand window to 30-60 minutes for more opportunities

Option 3: Review the 120-minute window results for longer-term opportunities
