

■# ALEX PLACE FOUNDER REAL PASS CONVERGENCE (2026-05-27)

LIVE EVIDENCE SNAPSHOT

Metric	Value	Source
Wallet cleared cash	\$0	data/wallet/local-cash-wallet.json
Wallet pending invoices	\$199	data/wallet/local-cash-wallet.json
Wallet draft invoices	\$199	data/wallet/local-cash-wallet.json
Ledger event count	3	data/wallet/ledger.jsonl
Latest ledger event	invoice_sent	data/wallet/ledger.jsonl
Arc Reactor Movie 1	88	data/arc-reactor/status.json
Arc Reactor Movie 2	54	data/arc-reactor/status.json
Arc Reactor Movie 3	22	data/arc-reactor/status.json
RAG record count	108	manifests/FLAT-RAG-HOUSE-LATEST.md
Recent conversations	20	manifests/FLAT-RAG-HOUSE-LATEST.md

WHY THIS PASS IS MORE REAL

- 1. Uses direct local metrics from wallet, arc reactor, and RAG manifests.
- 2. Uses deterministic tesseract geometry driven by those metrics.
- 3. Keeps claims bounded to evidence classes.

PAST 2 WEEKS (OBSERVED)

Lane	Observed Result	Confidence
Report pipeline	Multi-renderer stack exists and validates locally	High
Wallet discipline	No fake revenue; invoice lifecycle started	High
RAG consolidation	Flat house and stream index present	High
Execution posture	Dirty repos visible; no unsafe reset actions	High

NEXT 2 WEEKS (FOUNDER ACTION)

Priority	Action	Proof Required
Money outcomes	log 5 real outcome events (reply/reject/call/paid)	ledger.jsonl additions
Conversion	close one explicit yes/no decision on offer	invoice/objection event
Evidence hygiene	weekly founder packet with dated artifacts	new reports/ + artifacts/ pair
Claim integrity	claim-to-evidence table for all patent candidates	appendix table

NEXT 4 WEEKS (CONVERGENCE)

Week	Target	Evidence Gate
1	stabilize runbook cadence	2 consecutive validated packet runs
2	expand repo appendices	one page per repo lane

Week	Target	Evidence Gate
3	external-safe founder brief	evidence-only summary export
4	promote/hold checkpoint	confidence delta table + signoff

WEB-GROUNDED CONTEXT (CURRENT)

Source	Signal	Founder Use
U.S. Census BTOS (May 26, 2026)	AI use trends remain active across business functions	keep services practical and scoped
OECD SME AI adoption (2025)	adoption gains depend on maturity/capability fit	target right-fit buyer lanes
NIST AI RMF + GenAI profile updates	governance and risk controls are expected	keep validation and boundary language explicit
GAO-26-107828 (May 2026)	opportunity exists with transparency/control gaps	sell with controls-first posture

FOUNDER DECISION

Promote real-pass operational discipline now. Hold broad market claims until wallet and user outcome receipts increase.
