

Arc Reactor Confidence Read

Generated: 2026-05-26.

Repo: <https://github.com/alex-place/lantern-os>

CURRENT STATE

You have an Arc Reactor now in the Lantern sense: a power-state model that connects ambition to evidence.

Phase	Confidence	Why
Movie 1 Garage	88	repo, whitepaper, ADS, RAG house, Tony Garage, wallet, dual-boot prep, store lanes
Movie 2 Public Platform	54	Itch/store lane exists, cash sprint is send-ready, but public/user/cash/install proof is not repeated yet
Movie 3 Distributed Fleet	22	server farm, phone, second PC, automation, recovery are mapped but not field-proven
Avengers	held	wait for v1, users, cash, devices, recovery

UPGRADE PATH

To move the Arc Reactor toward Movie 2:

- 1. Send 5 warm messages and record events.
- 2. Create the first Itch-ready ZIP/HTML demo.
- 3. Run elevated dual-boot prep.
- 4. Shrink D: physically and rerun readiness.
- 5. Record any buyer/user result in the wallet and belief ledger.
