

■# COMET LEAP Mookman11 !perfect Report v5

FOUNDER SIGNOFF LINE

mookman11 now has an updated !perfect report generated from their profile and live local evidence. Cleared cash remains factual at \$0 and the latest ledger event is invoice_sent.

EXECUTIVE SNAPSHOT

Lane	Current State	Confidence	Evidence
Profile state	Profile-driven report structure is active	High	profiles/mookman11/profile.json
Wallet state	Cleared \$0, pending \$199, draft \$199	High	data/wallet/local-cash-wallet.json
Event stream	Latest event is invoice_sent	Medium-High	data/wallet/ledger.jsonl
Report pipeline	!perfect markdown-to-pdf pipeline available	High	scripts/Build-PerfectArtPdf.ps1

WALLET TRUTH

Metric	Value
clearedCashUsd	\$0
pendingInvoiceUsd	\$199
draftInvoiceUsd	\$199

PROVEN VS PLANNED

Category	Proven Now	Planned Next
Personalization	Profile exists for mookman11	Tune section order and tone from usage feedback
Evolution	Persistent JSONL log tracks report generation	Add feedback scoring per section after each readout
Delivery	Markdown artifact generated now	Render and ship PDF packet each run

72-HOUR ACTIONS

- 1. Add one profile-specific objective update to profiles/mookman11/profile.json.
- 2. Record real outcome events in wallet ledger (sent, objection, cleared, refund).
- 3. Generate next report and compare deltas in evolution log.

DECISION

Keep this profile-evolving report loop active. Use local evidence first, then improve style and structure from each person-specific run.
