

■# FOUNDER CONVERGENCE LOOP B - CASH AND CLAIMS

TIME WINDOWS

- Past 2 weeks: local execution, report pipeline, wallet discipline, RAG consolidation.
- Next 4 weeks: proof conversion, repeatability, and founder decision cadence.

WEB-GROUNDED SIGNALS (CURRENT)

Source	Signal	Confidence
U.S. Census BTOS story (May 26, 2026)	AI use expectations remain material in several sectors; trend not collapsing.	High
OECD SME AI adoption paper (2025)	Benefits correlate with digital maturity and scoped use, not indiscriminate rollout.	High
NIST AI RMF 1.0 + GenAI Profile update (July 26, 2024)	Risk-managed adoption should govern build/deploy and claims.	High
GAO SBA AI report (May 2026)	Adoption interest is real, but policy/controls and capability gaps remain practical constraints.	Medium-High

CONVERGENCE TABLE

Lane	Past 2 Weeks	Next 4 Weeks	Confidence
Evidence discipline	Built/updated printable artifacts and validation loops	Lock dated release cadence with receipts	High
Wallet reality	invoice_sent logged, cleared cash remains \$0	Capture outreach outcomes and one terminal result	High
Product narrative	Founder packets now coherent and reproducible	Tighten by persona and channel	Medium-High
Operating control	Local-first repo + RAG house remain central	Add deterministic appendix and claim-index outputs	Medium

FOUNDER ACTIONS (NEXT 14 DAYS)

- 1. Log 5 factual money-motion events (sent/replied/rejected/call/paid).
- 2. Run one weekly packet release with dated artifact names.
- 3. Add a claim-to-evidence index for all patent-candidate language.
- 4. Keep every promotion tied to repo_verified or explicit projection labels.

FOUNDER ACTIONS (DAYS 15-28)

- 1. Convert one packet into a paid pilot or explicit no-go signal.
- 2. Score each lane with confidence deltas only when new receipts arrive.
- 3. Produce one external-safe summary and one internal technical annex.
- 4. Decide promote/hold on each novel workstream and patent candidate.

CONFIDENCE NOTES

- Strongest confidence: local evidence pipeline and wallet discipline.
- Medium confidence: near-term conversion to paid outcomes.
- Lowest confidence: broad public-market claims without fresh receipts.

LANE FOCUS

Cash focus: protect factual ledger semantics and accelerate outcome capture.
