P0 — CASH SURVIVAL LANE

The immediate founder lane is not new product expansion. It is a narrow manual cash loop around the existing **\$199 Lantern Local RAG / Repo Cleanup Sprint**.

The sprint converts one messy folder, repo, PDF set, or AI/tool stack into a clean before/after packet with source inventory, RAG-ready flat file, claim/evidence index, blockers, next actions, and a short report when useful.

```
I have 2 paid pilot slots open this week.

I can take one messy folder, repo, PDF set, or AI/tool stack and turn it into a
clean before/after packet:

- source inventory
- RAG-ready flat file
- claim/evidence index
- blockers and next actions
- short PDF/report if useful

Entry pilot is $199. Want me to run one small before/after on a project?

Cleared-Cash Rule

Cleared cash remains \$0 until provider/bank proof exists. A reply, verbal yes, draft invoice, pending invoice, payment link, screenshot without settlement, or promise to pay does **not** count as cleared cash. Update the wallet and ledger only after external payment proof exists.
