

Lantern Solar Charger Scarf MK1 Concept

Status: public-safe concept artifact
Date: 2026-05-29
Surface: Lantern OS / Orion Body Memory Line / TikTok Store candidate
Evidence class: operator_asserted + generated concept art summary
Boundary: no certified charging, medical, safety, or production claim

SUMMARY

The Lantern Solar Charger Scarf MK1 is the first viable storefront anchor for the Orion Body Memory Line.

It is a body-conforming travel accessory that pairs a graphite travel scarf or wrap with hidden storage, a watch dock loop, a phone sleeve, a removable memory puck, and a local-first MCP memory flow.

The best public version is practical and claim-safe:

- travel scarf / wrap first;
- compression tank second;
- support bralette third;
- travel wrap fourth;
- memory puck and ship kit as accessories;
- all electronics removable;
- local-first memory by NFC or QR fallback;
- no silent recording;
- no medical monitoring claims;
- no certified power claim until tested hardware exists.

STORE LINE

Public line name:

Lantern OS Orion Body Memory Line

Store phrase:

Body-conforming travel wear + local memory tap.

Core promise:

Tap the garment, confirm on phone, store the setup locally, retrieve it later.

PRODUCT FAMILY

SKU	Store role	Safe public claim	Held claim
Orion Charge Scarf	first launch item	hidden phone sleeve, watch dock loop, memory puck pocket, travel-ready textile	certified solar charging
Orion Compression Tank	bodywear expansion	body-conforming fit, hidden phone side pocket, removable memory puck	biometric monitoring
Orion Support Bralette	innerwear expansion	supportive shell, removable puck, soft rib band	medical-grade sensing
Orion Travel Wrap	premium outerwear	cross-body closure, phone/passport pocket, reflective constellation stitching	safety guarantee
Memory Puck	accessory	NFC/QR identity token and local memory trigger	secret storage or surveillance

SKU	Store role	Safe public claim	Held claim
Ship Kit	bundle	selected garment, puck, pouch, quick start card, packaging	production-ready electronics

MK1 SCARF DESIGN

Visible elements:

- graphite woven scarf body;
- teal constellation stitch pattern;
- muted gold Orion / Lantern OS compass mark;
- hidden phone sleeve sized for common smartphones;
- slim battery-bank pocket for an off-the-shelf certified pack;
- watch dock loop for carry and visual continuity with the Orion Watch;
- removable memory puck pocket;
- reflective stitch accents;
- quick-start card showing tap, confirm, store, retrieve.

Charging language for MK1:

solar-inspired textile pattern
charging-ready pocket
power-bank compatible
assistive top-up concept pending hardware validation

Avoid these phrases until evidence exists:

self-charging
solar-powered phone charger
medical-grade
heart-rate tracking
respiration tracking
emergency safety device
always recording

LOCAL MCP MEMORY FLOW

The product should use an intentional action flow only:

Tap scarf or puck -> confirm on phone -> store to local MCP memory -> update RAG manifest -> retrieve setup on next tap

Minimum memory tools:

lantern.memory.store
lantern.memory.retrieve
lantern.memory.converge
lantern.memory.list_recent
lantern.memory.redact
lantern.memory.export_manifest

Example memory record:

```

}
```

TIKTOK STORE POSITIONING

Store-safe listing title:

Orion Charge Scarf - Travel Scarf with Hidden Phone Sleeve, Watch Dock Loop, and Local Memory Tap

Short bullets:

- body-conforming travel layer;
- hidden phone sleeve;
- watch dock loop;
- slim battery pocket;
- removable memory puck;
- reflective constellation stitching;
- soft woven graphite fabric;
- local-first tap setup;
- no cloud required for the local demo path.

Launch bundle:

Orion Charge Scarf
Removable Memory Puck
Magnetic Pouch
Quick Start Card
Premium Packaging

SUPPLIER / SAMPLE CHECKLIST BEFORE BATCH OF 2

Do not start a paid production batch until these are checked:

- textile sample received;
- pocket dimensions measured against target phones;
- wash/care label defined;
- all electronics removable;
- no sewn-in uncertified battery;
- thermal risk reviewed for any power accessory;
- magnet placement tested near watch/phone;
- NFC/QR flow tested against local MCP endpoint;
- packaging contents counted;
- return and sizing language drafted;
- TikTok Shop category and prohibited-claim review completed.

LINKED ARTIFACT

artifacts/lantern-solar-charger-scarf-mk1-diagram.svg

CURRENT STATE

Promote to candidate only after repo commit and refetch validation.

Held items:

- real solar panel efficiency;

- battery chemistry;
- waterproofing;
- wash durability;
- shipping cost;
- supplier MOQ;
- TikTok Shop approval;
- local MCP live tool enumeration;
- batch-of-2 supplier lead process.

NEXT SAFE ACTIONS

- 1. Validate this report exists on master.
- 2. Validate the SVG diagram exists on master.
- 3. Add a local MCP memory API spec if the connector surface is available.
- 4. Build a supplier outreach sheet for two samples only after claim language is locked.
