

# Mookman \$20 Wallet Install Fix

Date: 2026-05-26

Branch: fix/mookman-20-wallet-version -> master

Mode: private repo setup repair, no-secrets install path

## FAILURE OBSERVED

Mookman ran the setup from C:\Users\micah\Documents, but Windows returned:

```
git : The term 'git' is not recognized as the name of a cmdlet, function, script file, or operable program.
```

Because Git was missing, the clone commands did not create either repo folder:

```
C:\Users\micah\Documents\lantern-os  
C:\Users\micah\Documents\gm-agent-orchestrator
```

The later cd, start, and git status commands failed only because the repo folders were never cloned.

## FIX

Install Git for Windows first, then reopen PowerShell.

Preferred command when Windows Package Manager is available:

```
winget install --id Git.Git -e --source winget
```

After Git installs, close PowerShell, open a new PowerShell window, and verify:

```
git --version
```

Then clone the private repos only after GitHub access is confirmed:

```
cd $env:USERPROFILE\Documents  
git clone https://github.com/alex-place/lantern-os.git  
git clone https://github.com/alex-place/gm-agent-orchestrator.git
```

Open Lantern Desktop:

```
cd $env:USERPROFILE\Documents\lantern-os  
start .\surfaces\lantern-desktop\index.html
```

Inspect orchestrator without changing anything:

```
cd $env:USERPROFILE\Documents\gm-agent-orchestrator  
git status --short --branch
```

## \$20 WALLET VERSION TODAY

The \$20 wallet version is ready as a pending pilot/support lane, not equity or an investment return.

Files added in this branch:

```
offers/MOOKMAN-20-WALLET-VERSION.md  
ledger/mookman-20-wallet-version-2026-05-26.yaml  
reports/MOOKMAN-20-WALLET-INSTALL-FIX-2026-05-26.md
```

The payment method must be chosen by the operator outside the repo. Do not commit payment secrets, Discord tokens, GitHub tokens, or account recovery information.

## DEFINITION OF DONE

- <b>1.</b> Mookman installs Git.
- <b>2.</b> Mookman reopens PowerShell.
- <b>3.</b> git --version works.
- <b>4.</b> lantern-os clones successfully.
- <b>5.</b> Lantern Desktop opens.

**6.** gm-agent-orchestrator clones or reports access issue.

**7.** \$20 receipt metadata is recorded only after payment lands.

**<b>8.</b>** Arc Reactor confidence increases only if setup/payment evidence changes.
