

■# NOVEL WORKSTREAM + PATENT CONVERGENCE (CARD STOCK EDITION, 2026-05-27)

FOUNDER SIGNOFF

This card-stock edition keeps only high-signal content: proven workstream state, patent-candidate framing, and a two-week execution map tied to evidence classes.

EVIDENCE STANDARD

Class	Definition	Promotion Rule
repo_verified	Local file/script/artifact exists and is inspectable now.	Can support immediate internal decisions.
metadata_only	Repo/lane is listed but not freshly inspected in this run.	Hold for intake before strong claims.
projection	Forward-looking target.	Must convert to receipts.
patent_candidate	Technical claim draft from implemented work.	Counsel + novelty review required.

CONVERGED STATE (PAST -> PRESENT)

Plane	Past Work (Established)	Present State (Converged)	Evidence
Control Plane	Lantern OS became canonical local convergence repo	Stable report + artifact spine operating	reports/LANTERN-OS-WHIT EPAPER-v0.1.md
Memory Plane	Flat RAG dollhouse model built with source labels	Repo universe and room map are queryable	skills/lantern-rag-dollhouse/references/LANTERN-OS-RAG-DOLLHOUSE.flat.md
Money Plane	Factual wallet model created	invoice_sent logged, cleared cash still \$0	data/wallet/local-cash-wallet.json, data/wallet/ledger.jsonl
Packaging Plane	!perfect report rendering path implemented	Dark WCAG + tesseract overlay style operational	scripts/Build-PerfectArtPdf.founder-v4.dark.ps1
Governance Plane	Arc Reactor staged confidence method formalized	Evidence-gated promotion model active	reports/ARC-REACTOR-12-STEP-CONVERGENCE-MODEL.md

NOVEL WORKSTREAM SET (10/10 DETAIL)

Workstream	Core Innovation	What Exists Now	What Must Be Proved Next
Profile-Evolving Founder Reports	Per-person adaptive report generation with persistent evolution log	Generator + profile + JSONL history are active	Add per-section scoring and explainable deltas
RAG-House Founder Master Packet	One top-level founder packet spanning all listed repo lanes	30+ page founder master report path exists	Deterministic appendix expansion per repo lane
Factual Wallet Intelligence Loop	Ledger state-machine splits draft/sent/cleared/objection/refund states	Scripted event appender and wallet JSON are in use	Log 5+ real outreach outcomes and 1 terminal outcome
Visual Compression Overlay	Dot/line tesseract layer preserves auxiliary operator cues while English text stays canonical	Locked founder renderer variant operational	Reader comprehension test across 3 operator personas
Unified Execution Wrapper	One command surface for wallet/report/validation loops	SDK-style invoker script introduced	Add strict schema IO and action receipts manifest

PATENT CANDIDATE DRAFTS (TECHNICAL, NON-LEGAL)

Claim ID	Draft Claim Language	Artifact Basis	Confidence
LC-001	Local-first system that ingests heterogeneous artifact sets into a source-labeled flat memory house and emits decision-grade report packets.	RAG flat file + report scripts + manifests	0.72
LC-002	Evidence-guarded wallet event state machine integrated into AI workflow loops to prevent revenue overstatement.	wallet JSON + ledger JSONL + event script	0.78
LC-003	Accessible report compiler merging semantic markdown, profile memory, and decorative symbolic overlays without shifting meaning away from text.	renderer variants + validator + profile generator	0.70
LC-004	Readiness governance model coupling confidence progression to evidence classes across local/public/distributed phases.	Arc Reactor model + ADS/whitepaper evidence taxonomy	0.68
LC-005	Symbolic compression overlay protocol embedding structured operator cues as non-authoritative visual metadata atop canonical textual records.	tesseract dot-line overlay implementation	0.64

CLAIM RISK AND DEFENSIBILITY MATRIX

Claim ID	Primary Risk	Defensive Move	Immediate Next Artifact
LC-001	Broad prior art in generic RAG systems	Emphasize source-labeled promotion gates and packetized decision outputs	claim-to-file mapping appendix
LC-002	Could be interpreted as business method	Anchor to implemented state transitions and anti-overstatement controls	event-transition formal spec
LC-003	Styling claims can be considered obvious	Tie to accessibility-preserving dual-channel semantics	WCAG + semantics test record
LC-004	Governance model overlap with existing maturity frameworks	Show explicit evidence-class coupling and promotion constraints	confidence transition proofs
LC-005	Utility/interpretability challenge	Position as optional auxiliary channel with no semantic authority	operator interpretation protocol

TWO-WEEK CONVERGENCE OUTLOOK

Window	Objective	Deliverable	Gate
Days 1-3	Freeze founder print pipeline	locked print profile + style lock note	3 successful re-renders
Days 4-6	Build patent-technical annex	claim-to-artifact index with evidence tags	internal review packet
Days 7-9	Strengthen money proofs	5 factual outreach events + outcomes	ledger receipts
Days 10-12	Expand repo appendices	one-page appendix per repo lane from RAG universe	30+ page regeneration pass

Window	Objective	Deliverable	Gate
Days 13-14	Decision checkpoint	promote/hold matrix with confidence deltas	founder signoff memo

PRINTER CARD STOCK NOTES

- 1. Dark high-contrast style with white text and strong accent lines.
- 2. Large body text and spacing optimized for physical readability.
- 3. Single-column table-led content to avoid print clutter.
- 4. No claims depend on color alone; text remains authoritative.

FINAL DECISION

Promote this card-stock edition as the internal executive print artifact for workstream and patent-candidate convergence, with all external legal claims held pending counsel and novelty review.
