

Movie 2 Readiness Report

Generated: 2026-05-31T03:31:21
Engine: Movie 2 Readiness Tracker v1.0
Status: IN PROGRESS

SIMPLE ANSWER

Movie 2 Public Platform readiness is at **35%**. 3 of 8 criteria met. Blocked by 3 critical items.

WHAT IT ACTUALLY DOES

This tracker evaluates the 8 criteria required to advance from Movie 1 (garage proven) to Movie 2 (public platform):

- 1. **Outreach sends** - Evidence of 5+ outreach attempts in wallet ledger
- 2. **Paid pilot** - At least 1 paid pilot or hard rejection batch
- 3. **Public proof** - Demo page or artifact visible to public
- 4. **User feedback** - Customer/stakeholder feedback receipt
- 5. **Discord health** - Bot health check passes without leaking secrets
- 6. **MCP canary** - Safety validation before any tool execution
- 7. **Dual boot ready** - D: shrunk and ready for NixOS installation
- 8. **Workflow usage** - External operator using a Lantern workflow

EVIDENCE / SOURCE DISCIPLINE

Sources Checked:

- Wallet ledger: D:\tmp\lantern-os\ledger\mookman-20-wallet-version-2026-05-26.yaml
- Reports directory: D:\tmp\lantern-os\reports
- Validation manifests: D:\tmp\lantern-os\manifests\validation
- Discord health script: D:\tmp\lantern-os\scripts\Test-DiscordBotHealth.ps1

Weight Distribution:

- Outreach: 15%
- Paid pilot: 20% (highest - revenue critical)
- Public proof: 15%
- User feedback: 10%
- Discord health: 10%
- MCP canary: 15% (safety critical)
- Dual boot: 10%
- Workflow usage: 5%

PROVEN / HELD / LOCAL-ONLY

Proven (Met Criteria):

- 1 public proof page or demo artifact (1/1)
- Discord lounge bot health check passes (1/1)
- D: shrunk and dual boot readyForInstall=true (1/1)

Held (Unmet Critical):

- 5 outreach sends recorded in wallet ledger [weight: 15%, gap: 4]
- 1 paid pilot or hard rejection batch [weight: 20%, gap: 1]
- MCP canary validates actual exposed tools [weight: 15%, gap: 1]

Local-Only:

- This report is local evidence only

- Promotion decision requires operator review
- ReadyForPromotion flag is advisory, not autonomous

NEXT SAFE ACTION

Focus on: 5 outreach sends recorded in wallet ledger [gap: 4]

Priority order:

1. Record outreach sends in wallet ledger (need 4 more)
2. Close first paid pilot or document hard rejections
3. Create public demo page for Lantern Garage
4. Collect user feedback from pilot participants
5. Validate MCP canary before any Discord-to-MCP execution

VALIDATION PATH

- ☐ Review this readiness report
- ☐ Verify wallet ledger entries are actual sends, not plans
- ☐ Confirm paid pilot has cleared cash or documented rejection
- ☐ Test public demo page accessibility
- ☐ Run MCP canary validation
- ☐ Operator approval for Movie 2 promotion
