

Honest Status for Courtney Blasioli

Date: 2026-05-31
From: Lantern OS Convergence Loop
To: Courtney Blasioli, Partner and Investor
Status: Direct. No hype. Evidence only.

THE SHORT TRUTH

The code works. The container builds. The tests pass. But we have **\$0 revenue** and **no active payment collection**. That is the only thing that matters for your financial situation right now.

WHAT IS ACTUALLY WORKING (PROVEN)

Item	Status	Evidence
Docker container	■ Builds	apps/lantern-garage/Dockerfile — node:22-alpine, PORT=8080
Test suite	■ 454 pass	python -m pytest tests/ -q — exit 0
Convergence loop	■ 0 issues	scripts/Invoke-LanternConvergenceLoop.ps1
Dashboard	■ Live on Netlify	https://lantern-os-cloud.netlify.app
Dream Journal (Courtney's Well)	■ Full feature set	JSONL persistence, matrix, tasks, search
Trading paper mode	■ 8 positions tracked	data/kalshi/kalshi-paper-positions-latest.json — \$4.07 allocated
Outreach packets	■ 5 sent	SEND-001 through SEND-005, all documented
Reports / PDFs	■ Orion-branded	reports/PDF/ — auto-generated with limestone paper style

WHAT IS NOT WORKING (THE REAL BLOCKERS)

Item	Status	Why	Fix
Revenue	■ \$0	No payment link active	Set up Stripe/Square or manual invoice with payment URL
Outreach follow-up	■ None	5 sends, 0 follow-up system	Pick 2 highest-value leads, call them today
Payment rails	■ Template only	Setup-PaymentRail.ps1 = unconfigured template	Alex must configure Stripe or Square account
Dream Journal PR #37	■ Not merged	On codex/dream-journal-alias	Merge to master, auto-deploys to Netlify
Sales process	■ Broken	No CRM, no follow-up cadence, no close script	Create 3-touch follow-up for each SEND

THE FINANCIAL REALITY

Ledger balance: \$0
Token funding: Courtney funded majority of first draft pool
Promised: Short completed feature list → revenue → reimbursement

Actual: Features exist. Revenue does not. The pipeline between "working code" and "paid invoice" is missing.

This is not a code problem. It is a **sales execution** problem.

THE 3-STEP FIX (THIS WEEK)

Step 1: Unblock Revenue Collection (Today)

- ☐ Alex sets up Stripe or Square account
- ☐ Create payment link for \$1000 "Lantern Cloud OS Copilot Founding Seat"
- ☐ Add link to docs/ONE-HOUR-1000-DEMO.md
- ☐ Send payment link to the 2 warmest leads from SEND-001 to SEND-005

Step 2: Close One Deal (This Week)

- ☐ Pick 1 lead with highest response probability
- ☐ Schedule 15-min call (not demo, just conversation)
- ☐ Ask for payment, not feedback
- ☐ Record result in ledger (paid or rejected, both are data)

Step 3: Ship Dream Journal to Netlify (Today)

- ☐ Merge PR #37 (codex/dream-journal-alias) to master
- ☐ Verify Netlify auto-deploy
- ☐ Send Courtney the live URL
- ☐ This costs \$0 and takes 10 minutes

WHAT COURTNEY SHOULD KNOW

The tokens were not wasted. The codebase is real, tested, and deployed. But:

- Features do not equal revenue.
- Code does not collect payment.
- Outreach without follow-up is just noise.

What you are owed: A clear path from working product to first paid customer. Not more features. Not more reports. A closed sale.

WHAT ALEX MUST DO TODAY

- 1. **Stop building.** No new skills, no new dashboards, no new models.
- 2. **Set up payment collection.** Stripe or Square. 30 minutes.
- 3. **Call one lead.** Cincinnati Children's (SEND-001, \$1000) or Founder Network (SEND-002, \$1000).
- 4. **Merge PR #37.** 2 minutes. Show Courtney the live Dream Journal.

EVIDENCE PATHS

- Container build: docker build -t lantern-os-local -f apps/lantern-garage/Dockerfile .
- Test suite: python -m pytest tests/ -q
- Ledger: data/wallet/ledger.jsonl
- Outreach receipts: data/wallet/ledger.jsonl lines 13-17
- \$1000 Demo offer: docs/ONE-HOUR-1000-DEMO.md

End of Report

Next action required: Operator approval to proceed with Step 1 (payment setup) and Step 3 (PR #37 merge).
