

Lantern Baseline Model v1

Generated: 2026-05-29T19:29:45-04:00

Status: baseline updated; v1.0.0 promotion still held.

What Changed

- Render was removed from the Lantern cloud truth path.
- AWS ECS Fargate is now the target cloud lane.
- Local remains primary at ``http://127.0.0.1:4177``.
- The internal RAG house was rebuilt from local source files.
- The baseline model now points to one JSON contract: ``data/baseline-model/v1.json``.

Ingest Receipt

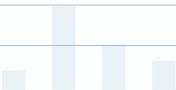

Surface	Count
Internal house RAG files	177
Flat RAG source repos	4
Flat RAG records	113
External cache records	113
Downloads merge records	26
Retired cloud mirrors	2

Evidence Hashes

Artifact	SHA256
<code>`data/internal-rag-house/RAG-HOUSE-MANIFEST.json`</code>	<code>`B78C578CE59BA792819620D5552A259CE6D64BDEC0C8658AE729A6E1791B1F7F`</code>
<code>`data/internal-rag-house/LANTERN-OS-INTERNAL-HOUSE-RAG.flat.md`</code>	<code>`41E2CEA4DD71464CE0BE5D8337F50A04AA75AC17F38B995E8AFB430188E69798`</code>
<code>`C:/tmp/human-flourishing-frameworks-scan/COMET-LEAPER-FOUNDER-MONEY-CONFIDENCE-REPORT-v1.pdf`</code>	<code>`667FB35EECF60A0B7AA91D0E90AA56449325C0405B05B789832B696736959593`</code>

Stats Receipts

Receipt	Status
<code>`data/kalshi/kalshi-watchlist-latest.json`</code>	Public Kalshi snapshot refreshed from 5,000 open markets across 5 pages; 20 watchlist rows; values below 20 cents and markets below <code>`\$5.00`</code> visible activity excluded.
<code>`reports/KALSHI-KOFI-WATCHLIST-REVENUE-REPORT.md`</code>	Profit range, data-confidence fields, manual-approval queue, and custom HFT/spread-capture research queue added; executable trade recommendations remain 0.
<code>`artifacts/KALSHI-KOFI-WATCHLIST-REVENUE-REPORT-2026-05-29-v3.pdf`</code>	Stats PDF receipt for the bounded Kalshi report.
<code>`manifests/validation/ONE-IDE-STATUS-LATEST.json`</code>	<code>`lone`</code> read-only preflight receipt with repo, MCP, local service, cloud mirror, and agent worktree status.
<code>`artifacts/ONE-IDE-STATUS-LATEST.pdf`</code>	One IDE status PDF receipt.

Receipt	Status
`artifacts/LANTERN-BASELINE-MODEL-v1.pdf`	Baseline model PDF receipt.

Baseline Model

Lane	Baseline
Front door	Local Lantern Garage first; AWS cloud mirror only after verified service URL.
Memory	RAG dollhouse uses source-labeled records and internal house hashes, not raw private dumps.
Commands	`POST /api/command` routes `!one`, `!converge`, and `!superjarvis` through one local-first endpoint.
Revenue	Founding AI copilot setup can be invoiced manually; cleared cash remains zero until payment clears externally.
Product	Lantern Cloud OS Copilot plus future BETTER shell; BetterSafe and BetterFun remain bounded by PWA/native gates.
Safety	No disk, bootloader, wallet, secret, agent-dispatch, or private-data mutation from cloud mode.

Pending Evidence Cards

Card	Status
`manifests/evidence/codex-thread-019e75ae-80d8-76a2-8a24-d1bff3b85fa1-2026-05-29.md`	Codex thread pointer saved; full thread body not available through exposed tools.
`manifests/evidence/kalshi-market-snapshot-2026-05-29.md`	Kalshi market page attachment saved as no-advice market snapshot.

Current Numbers

Signal	Value
Movie 1 garage confidence	92
Movie 2 public platform confidence	61
Movie 3 distributed fleet confidence	29
Cleared cash	0
Pending invoice	199
Verified cloud mirrors	0

Held Before v1 Promotion

- AWS service URL is not verified yet.
- Dirty worktrees block v1 promotion.
- No public cloud claim until AWS `/`, `/api/health`, and `/api/cloud-mirrors` pass.
- Private patient packets and conversations are excluded from cloud packaging.
- v1.0.0 tag remains held until the operator explicitly approves promotion.
