

Fleet Signal — Shnaider Validation Receipt

Date: 2026-05-29
Status: research-only receipt
Branch: master

FLEET SIGNAL

The highest-value validation target is still the Diana Shnaider 86% line. The correct action is not to trade; it is to run resolution-rule, market-metadata, order-book, and source checks.

The best normal research seeds are Swiatek and Sabalenka title baselines, followed by Osaka/Jovic as a short-horizon calibration sample.

WHY THIS MATTERS

A displayed market percentage is not a validated probability. The RAGDoll fleet should treat large gaps between visible market pricing and public baseline evidence as validation targets, not immediate trade signals.

REQUIRED VALIDATION CHECKS

Check	Purpose	Output
Resolution-rule check	Confirm exactly what the market resolves on	clear / ambiguous / reject
Market-metadata check	Confirm event, outcome, expiry, and token mapping	valid / stale / mismatched
Order-book check	Confirm depth, spread, and whether the visible price is executable	liquid / thin / misleading
Public-source check	Compare against current public evidence only	supported / unsupported
Baseline-stat check	Compare ranking, form, surface, draw, and historical rates	baseline range
Risk gate	Block private-info, jurisdiction, and autonomous execution risks	allow research / reject

CURRENT RESEARCH SEED PRIORITY

Rank	Seed	Role
1	Diana Shnaider 86% line	anomaly validation target
2	Iga Swiatek title baseline	normal high-value baseline
3	Aryna Sabalenka title baseline	normal high-value baseline
4	Osaka/Jovic	short-horizon calibration sample

HARD BOUNDARY

Do not trade from this receipt. Do not log into accounts, use wallet keys, execute orders, or automate betting. This receipt exists to preserve the validation target and fleet method.

SOURCE TRAIL

- Sources checked in the chat response before this receipt:
- Reuters French Open day-six coverage
 - Reuters Swiatek fourth-round report
 - Reuters Sabalenka/Gauff/Osaka progress report

- WTA ranking table snapshot

The full citations remain in the chat response that generated this receipt.
