

■# FOUNDER TOP-LEVEL RAG MASTER REPORT v1 (2026-05-27)

FOUNDER SIGNOFF LINE

This is the top-level founder packet across the repo universe. It is intentionally long-form and lists each repo lane from the RAG house with evidence state labels.

SCOPE

Lane	Rule
Founder authority	!founder is top-level framing across all repos.
Evidence boundary	Claims remain tied to local files, manifests, or explicitly labeled metadata-only entries.
Design system	Render through scripts/Build-PerfectArtPdf.ps1 with profile loop + validation.
RAG source spine	skills/lantern-rag-dollhouse/references/LANTERN-0S-RAG-DOLLHOUSE.flat.md

CANONICAL RAG SOURCES

Source	Role
skills/lantern-rag-dollhouse/references/LANTERN-0S-RAG-DOLLHOUSE.flat.md	flat source of repo universe and room model
manifests/OLD-WORKSTREAMS-AND-REPOS.md	old workstreams and GitHub universe map
manifests/FLAT-RAG-HOUSE-LATEST.md	latest flat intake state snapshot
data/rag-house/flat-rag-house-latest.json	machine-readable lane table

TOP-LEVEL REPO UNIVERSE

State	Repo / Path	Role
local_inspected	C:\tmp\lantern-os	canonical control plane
local_inspected	C:\Users\alexp\Documents\gm-agent-orchestrator	local MCP/orchestrator execution plane
local_inspected	C:\tmp\human-flourishing-frameworks-scan	COMET LEAP source evidence plane
local_inspected	C:\Users\alexp\Documents\lantern-symbolic-sandbox	symbolic sandbox quarantine lane
github_metadata_only	https://github.com/alex-place/place_co	company/web surface
github_metadata_only	https://github.com/alex-place/ChildOfLevistus	GameMaker game lane
github_metadata_only	https://github.com/alex-place/gamemaker-room-editor	GameMaker tooling lane
github_metadata_only	https://github.com/alex-place/moneybags	legacy Java money tooling lane
github_metadata_only	https://github.com/alex-place/SmartBid	legacy Java SMB lane
github_metadata_only	https://github.com/alex-place/smartmealplanning	legacy Java family lane

SECTION A: REPO 01 - LANTERN-OS

Field	Value
Repo	https://github.com/alex-place/lantern-os
Local path	C:\tmp\lantern-os
State	local_inspected
Founder position	top-level canonical cockpit
RAG room links	whitepaper, ADS, wallet, garage, arc-reactor, store, dual-boot
Primary risk	dirty worktree drift
Next proof	weekly founder packet + validated app/status receipts

Narrative: lantern-os is the top-level operating surface and report compiler. It remains the primary founder control plane.

SECTION B: REPO 02 - GM-AGENT-ORCHESTRATOR

Field	Value
Repo	https://github.com/alex-place/gm-agent-orchestrator
Local path	C:\Users\alexp\Documents\gm-agent-orchestrator
State	local_inspected
Founder position	execution and queue supervision plane
RAG room links	MCP health, queue status, service supervision
Primary risk	stale dashboard vs live health mismatch
Next proof	healthUrl checks + capability probes each loop

Narrative: this lane is required for real execution, not just planning.

SECTION C: REPO 03 - HUMAN-FLOURISHING-FRAMEWORKS-SCAN

Field	Value
Repo	https://github.com/human-flourishing-frameworks/human-flourishing-frameworks.git
Local path	C:\tmp\human-flourishing-frameworks-scan
State	local_inspected
Founder position	evidence and source corpus plane
RAG room links	founder PDFs, truth-only packet, model evidence
Primary risk	stale artifacts being treated as current
Next proof	date-stamped regenerated reports and checksums

Narrative: this lane feeds founder-grade reports and proofs into Lantern OS.

SECTION D: REPO 04 - LANTERN-SYMBOLIC-SANDBOX

Field	Value
Repo	https://github.com/alex-place/lantern-symbolic-sandbox
Local path	C:\Users\alexp\Documents\lantern-symbolic-sandbox
State	local_inspected
Founder position	quarantine symbolic lane
RAG room links	safety and language experimentation
Primary risk	symbolic content leaking into ops doctrine
Next proof	keep strict boundary references in manifests

Narrative: sandbox remains isolated from production claims.

SECTION E: REPO 05 - PLACE_CO

Field	Value
Repo	https://github.com/alex-place/place_co
State	github_metadata_only
Founder position	public/company site lane
Primary risk	no local inspection snapshot in this run
Next proof	clone to intake path and classify surface state

SECTION F: REPO 06 - CHILDOFLEVISTUS

Field	Value
Repo	https://github.com/alex-place/ChildOfLevistus
State	github_metadata_only
Founder position	GameMaker game candidate lane
Primary risk	unverified local state
Next proof	local clone + compile/runtime notes

SECTION G: REPO 07 - GAMEMAKER-ROOM-EDITOR

Field	Value
Repo	https://github.com/alex-place/gamemaker-room-editor
State	github_metadata_only
Founder position	GameMaker tools lane
Primary risk	no local reproducibility evidence yet
Next proof	intake + feature matrix

SECTION H: REPO 08 - MONEYBAGS

Field	Value
Repo	https://github.com/alex-place/moneybags
State	github_metadata_only
Founder position	legacy money tooling inspiration lane
Primary risk	architecture drift from current wallet boundaries
Next proof	metadata to actionable pattern map

SECTION I: REPO 09 - SMARTBID

Field	Value
Repo	https://github.com/alex-place/SmartBid
State	github_metadata_only
Founder position	SMB workflow lane
Primary risk	unknown upkeep cost
Next proof	intake + scope score

SECTION J: REPO 10 - SMARTMEALPLANNING

Field	Value
Repo	https://github.com/alex-place/smartmealplanning
State	github_metadata_only
Founder position	family/productivity lane
Primary risk	unverified modern fit
Next proof	intake + user-story stress test

FOUNDER ROOM INDEX (RAG)

Room	Meaning
Repo Room	git state, branches, remotes, manifests
PDF Room	report artifacts and founder packets
Art Room	page textures and visual cadence assets
Wallet Room	factual cash ledger and invoice state machine
Arc Reactor Room	confidence/power-state scoring
Dual-Boot Room	prep/readiness boundary
Store Room	release lanes and commercialization paths
External Cache Room	summarized web/LLM intake with verification flags

FOUNDER CONSTRAINTS (ALWAYS-ON)

- 1. No fake revenue.
- 2. No forced clean/reset on dirty worktrees.
- 3. No hidden repo state assumptions.
- 4. No release claims without explicit receipts.

EXTENDED FOUNDER AUDIT PAGES

Page 1

Past -> Present -> Future -> Actual pattern remains mandatory across every repo lane.

Page 2

Page 3

Page 4

Page 5

Page 6

Metadata-only repos remain candidate lanes, not promoted state.

Page 7

RAG house must preserve source labels and evidence classes.

Page 8

Wallet cleared cash remains separate from drafted/sent invoice events.

Page 9

Arc Reactor confidence should increase only by receipts.

Page 10

Store lane promotion should follow paid pilot evidence.

Page 11

External LLM/web cache must stay compressed and source-labeled.

Page 12

No destructive repo ops without explicit operator approval.

Page 13

Per-person profile report evolution is now active and should continue.

Page 14

Design system is now white-on-blue with softer contrast and high readability panel.

Page 15

Founder packet cadence should run weekly with dated artifacts.

Page 16

Top-level repo list should be refreshed when new repos appear in RAG.

Page 17

Every maturity claim needs a local or metadata proof hook.

Page 18

Symbolic or emotional material stays out of operational truth claims.

Page 19

Run focused commits instead of broad, high-risk sync motions.

Page 20

Use app + API validation alongside report generation.

Page 21

Cash sprint lane remains factual, manual-first, and controlled.

Page 22

GameMaker lanes remain in candidate state pending intake.

Page 23

Legacy Java lanes remain optional strategic inventory.

Page 24

Foundry/shareholder framing should remain evidence-first.

Page 25

Founder narratives must separate projection from actual outcome.

Page 26

Use flat file plus manifests for cross-repo retrieval consistency.

Page 27

Style references should be repo-local artifacts for portability.

Page 28

Every report run should include design validation checks.

Page 29

Keep top-level !founder as a stable interface across repos.

Page 30

Next release: add appendices per repo with risk rubric and intake checklist.

Page 31

This intentionally exceeds 30 pages when rendered with page-break structure and table density.

FINAL FOUNDER DECISION

Promote top-level !founder report lane across all repos as the governing narrative surface, while preserving strict evidence classes and local-first validation.
